

# The Herrington Report

January 22-25

## Class Wikispace Webpage

<http://armstrong-herrington.wikispaces.com/>

Be sure to take some time to look at the Genetics page on the classroom website. It has several great videos and virtual labs that are interesting. I also have the PowerPoints and the lab information we are doing in class Wednesday and Thursday. Check it out!

As soon as my computers are up and running, we will be utilizing the classroom website during class time.

## Quiz on Friday, February 1

The quiz will be given on the following topics next Friday.:

DNA	allele	heterozygous
chromosomes	homozygous	traits
genes	phenotype	genotype
mutation	punnett squares	
human genome project		
sickle cell anemia		

# student article

I need student volunteers to write student articles for the newsletter. It can be different students each week or the same person can volunteer to be the weekly writer.

The article will be about things going on in science class, including topics, labs, activities and projects. If you're interested, please let me know.
